

# NAD<sup>®</sup> MDC BLUOS 2i

## MDC BluOS 2i einrichten

### LIEFERUMFANG

Im Lieferumfang des Moduls finden Sie

- USB WLAN Modul (Dongle)
- Bluetooth Antenne
- USB Verlängerungskabel für Dongle
- Einbauschrauben

### SCHNELLANLEITUNG

Diese einfache Anleitung hilft Ihnen bei der Einrichtung des Moduls.

Das MDC BluOS 2i ist kompatibel mit den folgenden Geräten: C 368, C 388, C 390DD, M12 und M32.

### WICHTIG

*Stellen Sie immer sicher, dass Ihr kompatibles NAD Gerät die aktuellste Firmware installiert hat. Gehen Sie zur Produktseite unter [www.nad.de](http://www.nad.de) für weitere Informationen.*

### MIT DEM NETZWERK VERBINDEN

- Verbinden Sie ein Ethernetkabel (nicht enthalten) mit dem LAN Port des MDC Moduls und das andere Ende direkt mit Ihrem Router.

Alternativ kann das Modul auch mit dem WLAN verbunden werden. Siehe hierzu den nachfolgenden Abschnitt "MIT WLAN VERBINDEN".

### WICHTIG!

- Stellen Sie sicher, dass ein Ethernet und/oder WLAN Router vorhanden und eingerichtet ist.
- Diese Anleitung nutzt ein iPad als Referenz für die Einrichtung. Tablets, Smartphones und andere Geräte, die iOS oder Android unterstützen können ebenfalls als BluOS Controller eingesetzt werden. Diese Geräte sind nicht im Lieferumfang des BluOS 2 Moduls enthalten.

### CONNECT TO WI-FI

**1** Connect the supplied dongle (USB Wi-Fi module) to any of MDC BluOS 2's USB input terminals. You may also connect the dongle to the supplied extension cable and straighten out for better reception. Power up the NAD product where your MDC BluOS 2 is installed.

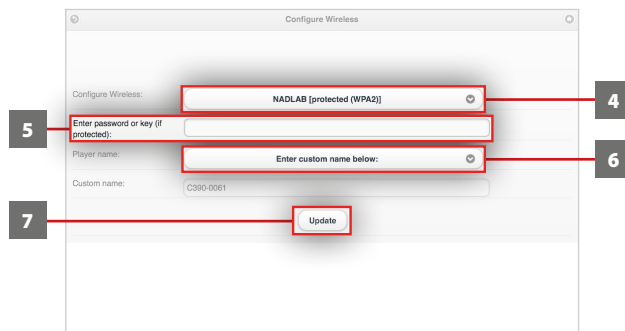

**2** Use your iPad (not provided) to search for the Wi-Fi network matching your MDC BluOS 2's unique network ID and join it.

**For example:** "C368-0061" where "0061" are the last four numbers of the unique Internet MAC identifier of your MDC BluOS 2. This is the same MAC ID highlighted in the supplied MDC BluOS 2 Mounting Instruction guide.

- 3** Selecting "C368-0061" from the "CHOOSE A NETWORK..." list in the "Wi-Fi" tab of Settings menu of your iPad should automatically open the "Configure Wireless" menu window. If not, open the web browser of your device and visit <http://10.1.2.3/>

- 4** From the "Configure Wireless", select your network or applicable wireless network name (SSID) ("NADLAB [protected (WPA2)]" in this example) from the "Configure Wireless" drop down menu.

- 5** Enter your network's Wireless Password (Passphrase, WEP/WAP key as applicable) in the field "Enter password or key (if protected)".

The Password (Passphrase, WEP/WAP key as applicable) is the same Password that was setup or generated during the configuration of your router or gateway. An incorrect password entered in the "Configure Wireless" menu screen will simply cause the unit to timeout and return to Hotspot Mode.

Trying multiple passwords will not damage the device in any way. If you are not sure what is your Password, login to your router and locate the Password in the applicable setup screen for Wireless Configuration section. Refer to your router's documentation for further information.

- 6** Select a "Player name" from the drop down list or use the on-screen keyboard to create a customized room name in the field "Custom name".
- 7** Select "Update" to save all your settings and complete the set up connection of your MDC BluOS 2. Do not forget to go back to the Wi-Fi Settings section of your iPad to confirm that it is reconnected to the correct WiFi network ("NADLAB [protected (WPA2)]" in this example) as set up at Step 4 above.

Your MDC BluOS 2 is now connected to your Wi-Fi network and ready to be used with the BluOS controller App.

## DOWNLOAD THE APP

Upon successful setup connection, you will be directed to the "Congratulations" page where you can select the highlighted "iOS App from the Apple App Store" to download and install the "BluOS Controller" App to your iPad.

For Android devices, download the free BluOS Controller App from Google Play.

After successfully downloading the BluOS Controller App, select  from your iPad screen to open the BluOS Controller.

## CONNECT TO MUSIC

You're now ready to stream music by selecting any source from the Local Sources, Playlist or Streaming Services.

Log in to your streaming music service by going to "Configure Player" from the menu screen and then select "Configure Music Services" to open up a list of supported streaming music services.

Follow the screen prompts and open your whole home to the pleasure of streaming HiFi music.

## IMPORTANT!

- Select "BluOS" source from your NAD product to listen to the streamed music from your installed MDC BluOS 2.
- Select "Help" from the navigation drawer of the BluOS Controller App for any guidance or queries about the operation of your MDC BluOS 2.

## CONNECT TO BLUETOOTH DEVICE

Pair Bluetooth device with the unique device ID of your MDC BluOS 2 (C368-0061 BT in this example, or the new customized name). Upon successful pairing, select "Bluetooth" in the BluOS Controller' menu screen to stream playback of the Bluetooth device.
